THE ORIGINAL TRITOON

SPIRIT . NEPTOON . SUNLOUNGER . SPORTTOON

JC TriToon Marine

A D V A N T A G E

- U-shaped pontoons offer **greater volume and carrying capacity** (1-2 person increase on average). Ride higher and drier. U-shape prevents water from getting on top of pontoon and weighing it down.
- **Cross members are bolted directly to pontoons** offering unmatched durability and strength. U-shaped tubes have **no stress on welds**, like round tubes have, because U-shaped tubes are bolted directly to cross members which increases the structural integrity. They are **NOT** bolted to a bracket that is then welded to the tubes which reduces the structural integrity of the overall boat.
- **Full length center pontoon on ALL TriToon boats** adds performance and quality of ride versus the partial third tube that is offered by some competitors.
- The TriToon™ Sport tube hull and tube design includes additional design innovations that **reduce water loads** and **allows for nearly seamless, cut-through performance**.
- Traditional round tubes used by competitors yields to more resistance and decreases the boat handling because the hull sits deeper in the water.

engineered for PERFORMANCE

TT (TriToon™) Hull

The TT (*TriToon*) hull uses three tubes (24" x 24") with the transom integrated into the center tube. This hull design features a standard in-tube 49 gallon fuel tank, aluminum bottom skin and optional in-tube ski storage. The TT (*TriToon*) hull is standard on the NepToon TT, SunLounger TT and Spirit TT.

Standard (twin tube) Hull

The standard hull for Spirit is the twin tube (24" x 24") hull. The optional aluminum bottom skin is recommended for horsepower over 70.

TriToon™ Sport Hull

The awesome TriToon Sport hull adds our exclusive lifting fin design to the TT (*TriToon*) hull. Our TriToon Sport hull not only increases top end speed but also yields handling that is as quick and precise as any sport boat. This hull features a 49 gallon in-tube fuel tank and optional in-tube ski storage. The TriToon Sport hull is standard on the SportToon TT, NepToon TT Sport, and SunLounger TT Sport. Lifting fins are an available option on the NepToon TT and SunLounger TT.

Celebrating Over 40 Years of Innovative Boat Design and Engineering

JC TriToon™ Spirit, NepToons, SportToon and SunLounger tubes are constructed of .100 gauge marine aluminum with a .125 nose cone – the strongest on the market.

JC Tube

Tube has more flotation than a 25" round with an advanced U-shaped design.

HIGH TIDE HULL (HTH)

The High Tide Hull is a new super structure on top of our proven U-shaped Pontoons. This heavier built super structure is designed to withstand the ever-increasing horsepower and torque of the next generation outboard engines. We have decided to be proactive in this new design to keep up with what the engine companies can deliver.

Some of the added advantages of the HTH are an additional 3" of free board above the water. This may not sound like much, but it generates a drier, softer ride in rough water. It also allows space between the pontoon deck and the pontoons for a bow anchor locker and a deeper in-tube storage compartment. The HTH hull on average, adds 400 pounds that contributes to the softer ride.

HTH available on:
NepToon 23TT, 25TT, 27TT
(Sport versions)
SunLounger 23TT, 25TT, 27TT
(Sport versions)
SportToon 24TT, 26TT, 28TT

When choosing the HTH option for your boat, it will include:

- High Strength Elevated Performance Hull w/350hp rating
- Bow Anchor Locker w/Marine Mat
- In-Tube Storage w/Marine Mat
- Taller SS Heavy Duty Ski Tow

The HTH Frame has heavy duty 5½" cross members that provides 3" of additional free board above the water.

SPORTTOON HTH shown

The Bow Anchor Locker compartment is built in to the frame of the HTH and the In-tube Storage compartment is even deeper.

COMPARE THE JC DIFFERENCE

If you are seriously researching our boats, then you have already ruled out the majority of pontoons currently on the market. You are now comparing us to the three or four premium manufacturers that build a pontoon in our price and quality range. There are many good pontoons in our price range. As you make your buying decision, we wish to point out a few of the standard and optional features on our pontoons that truly make the JC difference.

- ✓ Tubes bolted directly to the structural cross-members with heavy stainless steel bolts and lock nuts.
- ✓ All SuperTubes have baffles and are pressure tested to assure that they are air-tight [NO foam] before leaving the factory.
- ✓ Aluminum bottom skin is standard on all three-tubed models.
- ✓ 49 gallon fuel capacity is standard on all three-tubed models.
- ✓ Durable, attractive white or black powder coating is the standard rail finish on JC pontoons. (Spirit available in white only)
- ✓ SportToon, NepToon and SunLounger bimini tops are made of Sunbrella®.
- ✓ Top-of-the-line waterproof Clarion AM/FM/CD is standard on JC pontoons. (Spirit uses 3½" diameter AM/FM/iPod interface)
- ✓ "Designer Series" carpeting is stretched and stapled to the deck rather than glued.
- ✓ Solid extruded aluminum skid bar welded to all JC tubes.
- ✓ Bow cabinet "pods" with built-in SS lights. (SportToon)
- ✓ Sirius satellite radio is standard on SportToon and is optional on NepToon and SunLounger.
